Experiment -5

Mark Sheet Processing System

Aim

To create a simple Mark Sheet Processing System using Zoho One as a cloud-based Software as a Service (SaaS) application.

Procedure

1. Log in to the Zoho One cloud platform.

2. Open Zoho Creator from the Zoho One applications.

3. Create a new application for Mark Sheet Processing.

4. Create a new form named Mark Sheet Processing.

5. Add the required fields: Name of the Student, Register

Number, Subjects, Marks, Average, Percentage,

Rank, and Overall Performance.

6. Configure the field types according to the data required.

7. Design and arrange the form for easy user interaction.

8. Save and publish the form.

9. Enter sample student mark details into the form.

10. Submit the form and verify that the entered marks and

calculated result information are stored in the

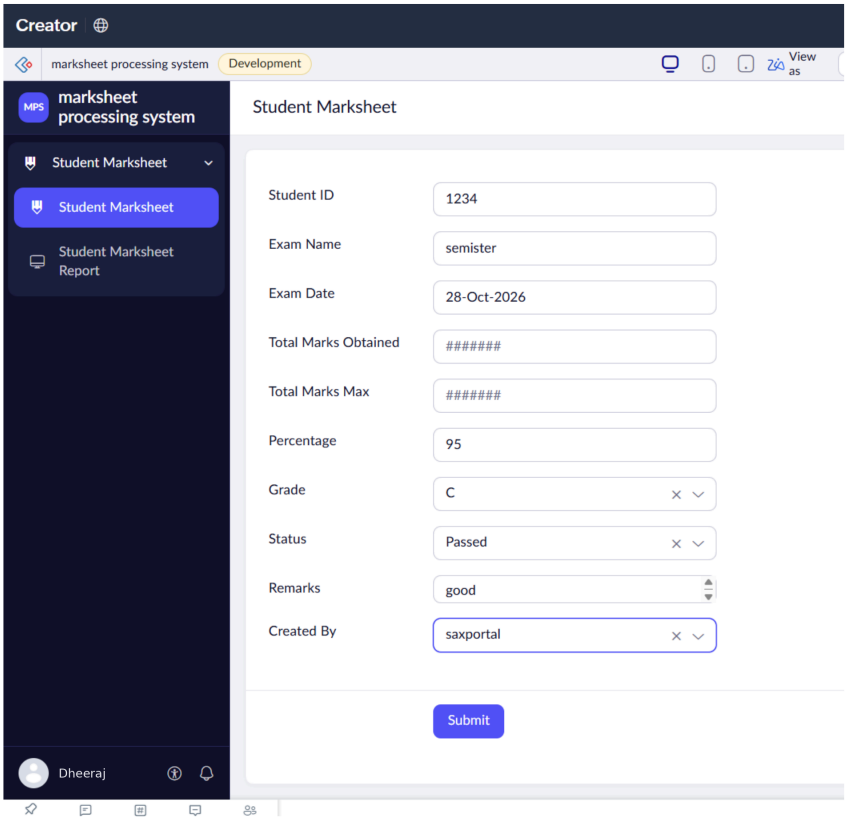

cloud.

11. Test the application by entering different student marks.

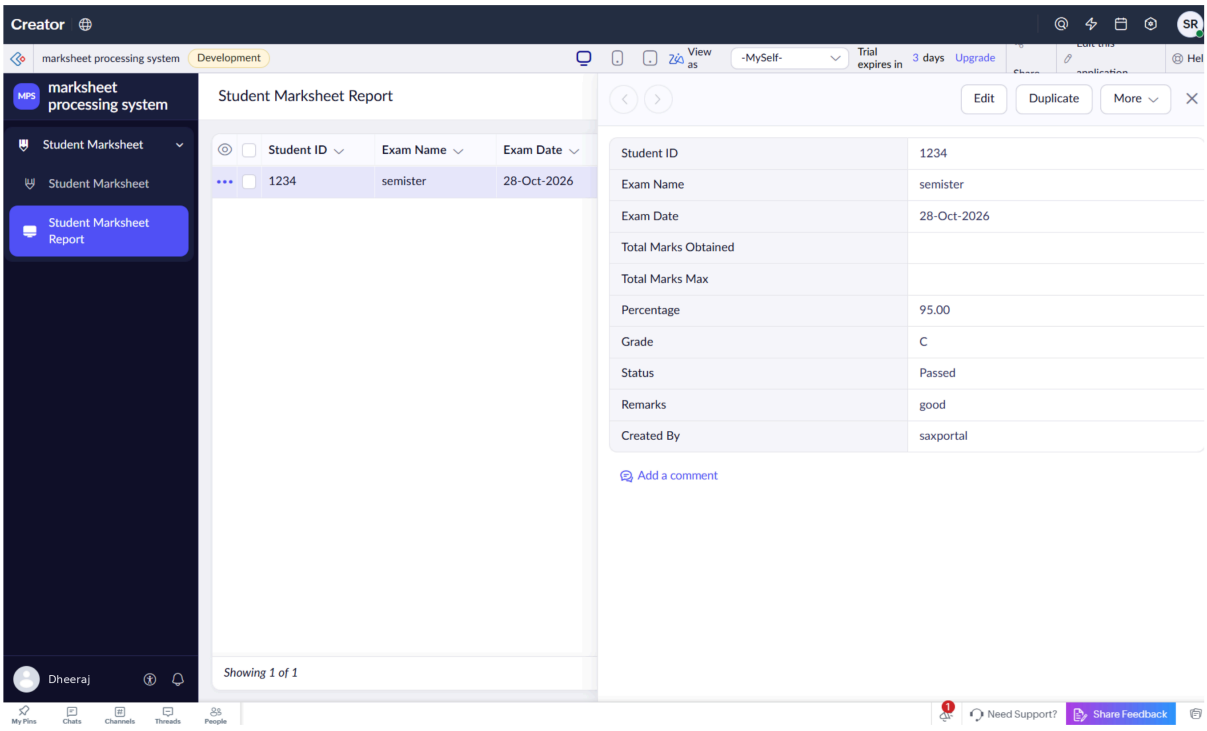

12. Verify that the Mark Sheet Processing System works

successfully as a SaaS application.

Implementation Input:

Output:

Result

Thus, a Mark Sheet Processing System was successfully created using Zoho One and demonstrated as a Software as a Service (SaaS) application. The required fields were entered, the sample record was submitted, and the stored output was verified in the cloud.
