Experiment -9

HOSPITAL INFORMATION SYSTEM USING CLOUD (SaaS)

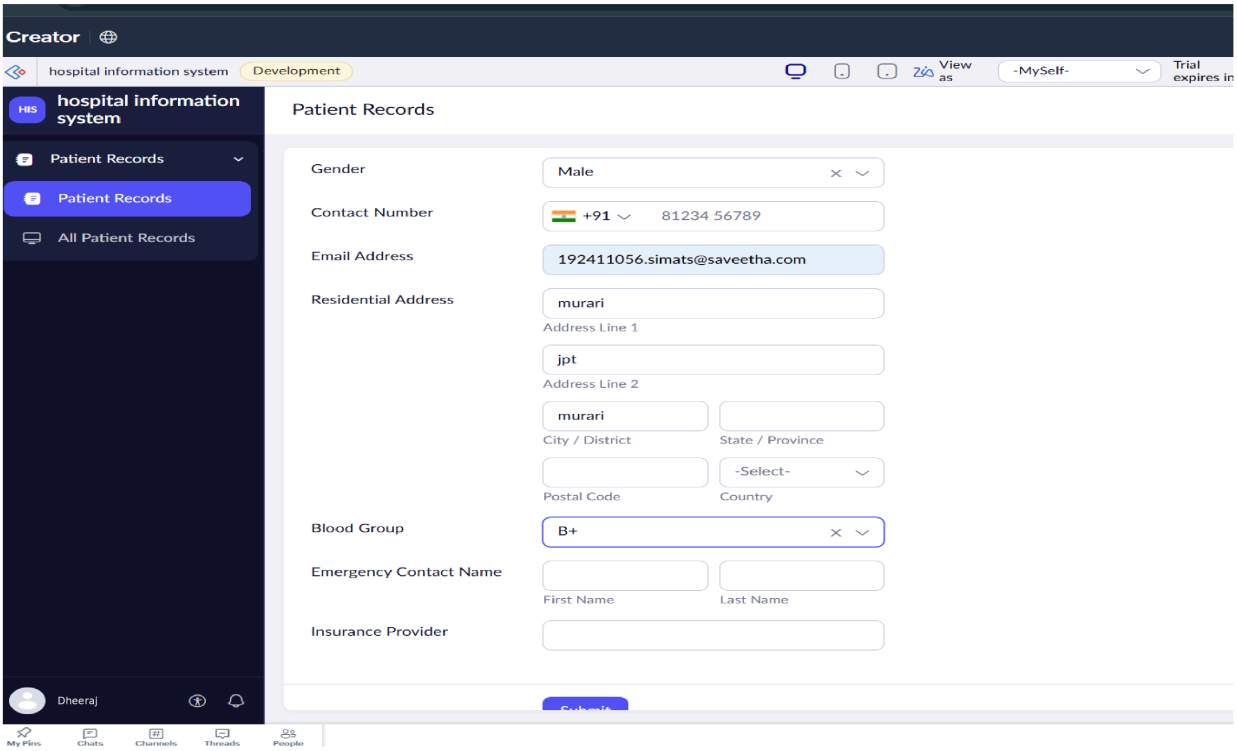

Aim

To create a simple cloud software application for **Hospital Information System for SIMATS Hospital** using any Cloud Service Provider to demonstrate SaaS..

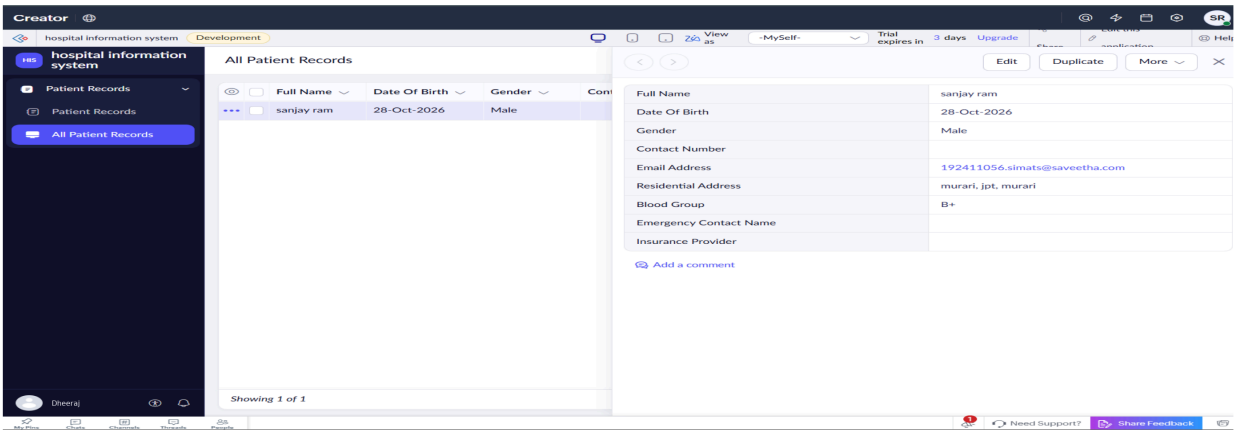

Procedure

1. Log in to the Cloud Service Provider.
2. Create a new application for Hospital Information System.
3. Create a patient information form.
4. Add the required fields:
5. Patient Name
6. Age
7. Address
8. Phone
9. Email
10. Attender Name
11. Attender Phone
12. Doctor Name
13. Disease
14. Configure the required field types.
15. Design and arrange the form.
16. Save and publish the application.
17. Enter sample patient information.
18. Submit the form and verify that the information is stored in the cloud.
19. Test the application with different patient records.
20. Verify the working of the Hospital Information System.

Implementation Input:

Output:

Result

Thus, a **Hospital Information System** was successfully created using a Cloud Service Provider and demonstrated as a SaaS application.
